

Anaphylaxis First Aid Course

This course has been designed for individuals who are required to provide first aid to a person experiencing anaphylaxis until the arrival of medical assistance. This means being able to identify the triggers, signs and symptoms of allergic reactions and anaphylaxis, and follow the standard first aid procedures to administer adrenaline using an adrenaline autoinjector to someone suffering anaphylaxis in the workplace or in the community.

Satisfactorily completing all requirements of this course provides the student with the ability to develop risk management and risk minimisation strategies for individuals diagnosed at risk of anaphylaxis in the workplace. This includes the development and implementation of pre-emergency risk assessment/management and the development and implementation of individual anaphylaxis management plans.

This course provides nationally recognised training for workers, or nominated workplace first aiders, from any industry sector and addresses the provision of care to adults and/or children in the workplace who are diagnosed as being at risk of anaphylaxis or displaying signs/symptoms of anaphylaxis.

** There are specific industries that require additional training such as childcare workers, school teachers and other related industries.

Provider of Training and Assessment

This course is delivered and assessed on behalf of Allens Training Pty Ltd RTO 90909 by

<Third party insert details here >

Important information prior to enrolment

Unit(s) Being Delivered

The following unit(s) will be awarded to successful participants in this course. The certificate will be issued by Allens Training Pty Ltd RTO 90909.

22300VIC Course in first aid management of anaphylaxis:

- VU21800 Provide first aid management of anaphylaxis
- VU21801 Develop risk minimisation and risk management strategies for anaphylaxis

Course Delivery

This course will be delivered in the workplace or at an <Third party insert details here > training facility.

Course Duration (face to face)

- **Face to Face – 3 hours** (minimum) – full face to face course
- **Blended delivery – 2 hours** (minimum) face to face – with the addition of 1-hour self-paced learning to be completed prior to attending the face to face course
- **Refresher training – 2 hours** (minimum) – conditions apply for this option, for example, you will need to provide previous current certificates.

Work Placement Arrangements

No work placement will be required as part of this course.

Learners Rights, Responsibilities and Support, including Complaints

Please note that enrolment to this course is made with Allens Training Pty Ltd RTO 90909. Please refer to the student handbook located on the RTO website allenstraining.com.au for all details relating to rights and responsibilities including complaints and appeals.

Course Fees and Payments

- Please refer to our booking calendar for individual course fees.
- **Refund and fee protection policy** – Please refer to the student handbook.
- **Payment Terms** – Payment for individual participants is upfront, group booking payment terms are based on agreement between the client and service provider.

Assessment Requirements

Individuals undertaking this course will be expected to complete both written and practical assessment tasks. These are detailed in the sections following.

Entry Requirements

- As a minimum, entrants to this course must have literacy and numeracy competencies equivalent to the Australian Core Skills Framework Level 2. An example of an ACSF Level 2 competency is being able to read and comprehend the ASCIA Action Plan for Anaphylaxis, request appropriate emergency assistance at the scene of the incident and complete incident reports.
- In addition, it is recommended that entrants have current competency in Cardiopulmonary Resuscitation (CPR).
- Participants must have the physical fitness to be able to meet the demands of the practical demonstration such as positioning a casualty ready to administer an autoinjector and administering the autoinjector.

What happens at the course?

Assessment Activities

Assessments conducted during face-to-face training session(s) include:

- **Practical demonstrations** - The assessor **must** observe the following:
 - Provide first aid treatment for anaphylaxis and administer adrenaline using a trainer autoinjector device on a mock casualty
 - Provide first aid treatment for mild to moderate allergy which progresses to anaphylaxis and administer adrenaline using a trainer autoinjector device on a mock casualty
- **Documentation** – The student must complete the following to the appropriate standard:
 - First aid/Incident report form
 - Complete a risk assessment for anaphylaxis and an individual management plan for a child with anaphylaxis based on a case study and information provided
 - Individual anaphylaxis management plan for a child, which includes a communication plan to raise awareness of the child's allergies, and their anaphylaxis management plan
- **Theory assessment** - A written exam consisting of multiple choice and short answer questions. All questions must be completed. Model responses are provided later in this document.
